Abstract

In an increasingly digital age where time management and productivity are paramount, "ConcentriQ" emerges as an innovative website designed to empower individuals in accomplishing their goals efficiently

Our website offers a dynamic task management experience, seamlessly blending a to-do list, focus timer, streak system, and a unique friend collaboration feature. Users can efficiently organize tasks, set timers for focused work, and maintain motivation through a rewarding streak system. A user-friendly login page ensures secure access.

With our platform, individuals can effortlessly prioritize and complete tasks, boosting productivity. The streak system encourages consistency, helping users build healthy habits. Moreover, our friend connection feature fosters accountability and motivation by connecting like-minded individuals striving to achieve their goals.

Introduction

In **To-Do List Management**, ConcentriQ offers users a user-friendly interface to create, prioritize, and manage their to-do lists. With customizable task options and deadlines, users can efficiently organize their tasks.

The **built-in focus timer** provides a structured approach to work and study sessions. Users can set timers for their tasks, where access to other websites is **prohibited**. The ConcentriQ goes beyond individual productivity by allowing users to compete with friends and develop mutual accountability.

For **Data Privacy** and Security users can create accounts and access their personalized task management dashboard while knowing their information is safeguarded.

This **streak** tool allows users for completing tasks consistently over consecutive days, where longer streaks give motivation to individuals.

Existing systems

There are products like habitnow, google calender and anydo which mainly cater to student focus and categorise as scheduler applications though widely used have certain limitations

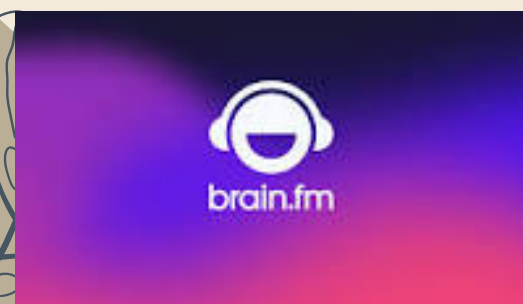

Google Calendar allows users to create and edit events and also recurring ones

Any.do provides users with service of creating and scheduling tasks thereby acting as a daily planner and

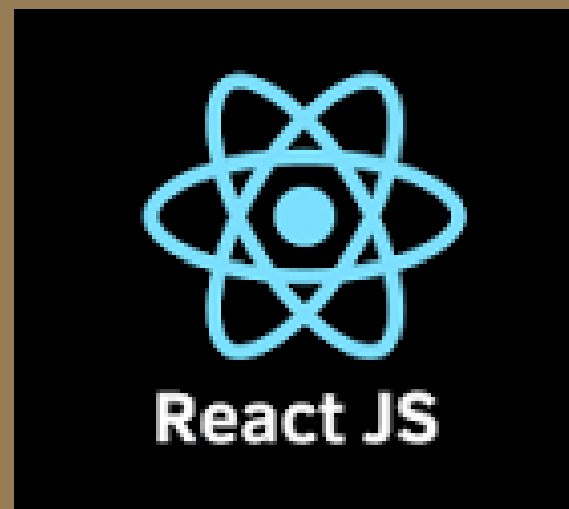

Pomofocus is a customizable pomodoro timer that works on desktop ,uses Pomodoro Technique for time management

AI-driven music streaming service designed to enhance focus, relaxation, and sleep.Offers a unique approach to using music as a tool for productivity
